PsyCurio

Working Student Developer (m/f/d)

Revolutionize with us the digital health market in the field of psychotherapy! We develop an innovative virtual reality software. The software can be used to treat various psychological and later neurological disorders. The product is developed and scientifically validated in close cooperation with renowned clinics. The team is interdisciplinary, was awarded by the BMWi in 2018 and receives strong support from the founding scene and scientific institutions.

Your Responsibilities

- You participate in the co-development and programming of our VR therapy app
- You take on independent development tasks for a prototyped therapy app based on Android and iOS
- You take care of the further development of our website
- You are committed to our dynamic team so that we can achieve our goals together
- You take part in interesting conferences, meetups and other events and make new contacts

Your Profile

- You are currently studying with a focus on computer science and would like to gain more practical experience
- You have a strong affinity for IT as well as programming skills and would like to help shape VR, mobile and web development
- You are independent, responsible and interested in learning new things
- You can process tasks systematically and in a structured manner
- You like dealing with people
- You have motivation to want to make a difference

What we offer

- Get to know all processes first-hand from a start-up team.
- Independent work with great freedom to contribute your ideas
- Develop your own strengths and take part in workshops
- Start-up spirit: flat hierarchies, participation in interesting events, open communication, family and interdisciplinary team

When and where?

When: entry possible at any time, flexible number of hours, max. 19.5 hours

Where: Technology Park in Paderborn, here we meet several times a week. Home Office is also possible.
